## Endnote X4 : now available

EndNote X4 (both Windows and MAC versions) is now available for download from QUT Library's EndNote website at <http://www.library.qut.edu.au/services/endnote/>.

It is also available on CDROM (both Windows and MAC versions). However the CDROM's are in such high demand currently that you are better off downloading it.

If you do prefer the CDROM just do a Title

search using EndNote X4 Windows or EndNote X4 Mac in the QUT Library Catalogue to get the holdings information.

Please note that the QUT Cite|Write editorial team are currently updating the QUT Harvard EndNote style and the QUT APA EndNote style files to reflect recent changes to these styles.

EndNote X4 online tutorials are available from [http://www.endnote.com/training/tutorials/EndNoteX4/EndNote\\_X4.asp](http://www.endnote.com/training/tutorials/EndNoteX4/EndNote_X4.asp)  
If you would like to attend a hands-on training session go to <http://www.library.qut.edu.au/services/endnote/training.jsp> and select See classes scheduled.

## PubMed etools : biomedical text mining

A large number of easy-to-use web-based applications (etools/biomedical text mining tools) for **PubMed** data are available, that utilise novel bio-linguistic statistical methods and other algorithms to discover true associations between concepts, authors, sequences and other relevant bits of information. They also help to improve readability and the presentation of **PubMed** search output. Analysis of a defined set of citations is also a common feature of many of **PubMed etools**.

In the right hand column are listed just a few **PubMed etools** of various functionality.

Please let me know if you would like me to organise a workshop to demonstrate the functionality of those **PubMed etools**.

Please e-mail requests to Dr Nina Prasolova ([n.prasolova@qut.edu.au](mailto:n.prasolova@qut.edu.au))
