Build your Researcher Profile
Session progress:

• Why build your Researcher Profile
• Icebreaker: Google yourself
• How to build your Researcher Profile:
  o Bronze: Get started now
  o Silver: Build content gradually
  o Gold: Enhance further
• Background and demo of the tools
• Hands-on and questions
Why?

- To promote research and teaching activities
- To improve your chance of being cited
- To ensure correct attribution
- To guarantee credit in research assessments
- To find new collaborators
- To find new funding sources

Library Guide:
http://libguides.library.qut.edu.au/researcher_profile
Google Yourself

“firstname lastname”

• Look at the first page of hits
• What is you and what is not
• Which ‘persona’ is being represented
• What is inaccurate, out of date
• What is missing
• What should you ‘retire’
Dr Axel Bruns is a Professor in the Creative Industries Faculty at Queensland University of Technology in Brisbane, Australia, and a Chief Investigator in the ARC Centre of Excellence for Creative Industries and Innovation. Wikipedia

"be visible or vanish"
* Researcher faints at the thought of another author profile.
You have a time today to Go for Bronze

Put aside time in coming weeks to Go for Silver

By the end of semester start working to Go for Gold
Bronze

The essentials now

- Get your staff profile: 2 Minutes
- Upload publications to ePrints: 30 Minutes
- Get an ORCID id: 1 minute
- Start a Google Scholar profile: 15 Minutes
- Enhance your Email signature: 5 Minutes
Staff profile: # 1 in Google

http://staff.qut.edu.au
QUT ePrints

- Get your publications in as soon as possible
- Visible via the national search interface, *Trove*
- Open to the world via *Google Scholar*

Deposit research now
- Academic profiles
- Research Data Finder
- Research Support Services
- Repository statistics

2 minute deposit:

- Enhance your ORCID profile
- Consider other networking platforms
- Consider social media tools
Summary

My passion is in the residential property economics and urban, real estate development, with a special expertise in seniors housing. I have over seven years of experience in real estate development business and over nine years of experience in international, academic research in housing markets and residents’ preferences. At the moment I work as a lecturer in property economics continuing my research in housing market and analysis.

Twitter: Tips: Start lurking

- 1 in 4 tweets - directly about your work
- 1 tweet – a reply to someone you follow
- 1 tweet - a link to something useful
- 1 tweet - a retweet
  - Ask questions as well as making statements
  - Best when it’s both professional & personal
  - The tone mimics face to face interaction (not print)
  - The more people tweet, the bigger their network

Dr Liz Ellison
Emerging academic interested in Australian beaches, fiction, and film | learning and teaching

About Me

I am a lecturer in postgraduate coursework at QUT in Brisbane, Australia. I have experience teaching across a wide array of subjects in the arts and humanities, with particular interest in Australian studies. I also research into teaching and learning, particularly in the postgraduate coursework space.

How to keep your house cool in a heatwave

If overnight temperatures are due to fall below your inside temperature, open the house as much as possible from late afternoon. Image from shutterstock.com

Should you open or close your house to keep cool in a heatwave? Many people believe it makes sense to throw open doors and windows to the breeze; others try to shut out the heat. I listen to talk radio during a hot spell and you are likely to hear news reports of people suffering heat exhaustion or heat stroke. So what should you do?

Dr Miller conducts industry and government funded socio-technical research on efficiency and renewable energy, with a particular focus on the built environment. Current and recent research topics have included manufacture of sustainable housing, housing performance and valuation, housing and health of cool roof coatings for cooling loads in subtropical and tropical buildings; and performance assessment of subtropical and tropical housing.

She is particularly involved in promoting and implementing multidisciplinary embrace of building simulation and modelling software; building science; post-assessment and the links between urban planning, buildings and the electricity grid.

Outcomes

“As a first time Conversation author, the results [49,000+ readers] far exceeded my expectations."

- Talk back show
- Interviews on ABC and commercial Radio
- TV Breakfast interview

Results from the article and media interviews

- Very happy funding partners, approaches from new possible partners
- Exceeding the requirements for dissemination of the research
- Invitation to submit to a relevant journal and to review an article for another
- Invitation to present at a conference
- A spike in QUT e-prints downloads

“It has really lifted my spirits and enthusiasm for this year.” – Dr Wendy Miller
